Tangra, Inc., a Microsoft Gold Certified Partner, has released its latest solution SQL Studio Data Compare. Data Compare is an advanced data comparison utility for Microsoft SQL Server databases that helps to visualize changes in data and keeps databases in sync. It provides a high speed data analysis and generates instant results.

SQL Studio Data Compare functions at a glance

- Compare all tables in two databases, or a selection of tables
- Save compare sessions
- Color coding for differences
- Filter the data to show only differences
- Support for remote servers
- Powerful synchronization options for all rows, selected rows, selected columns
- Flexible options for comparing BINARY and NTEXT data using third-party diff tools
- Filters by rows and columns
- Data search by keywords

SQL Studio Data compare supports Microsoft SQL Server 2005 (all editions), Microsoft SQL Server 2005 Express, Microsoft SQL Server 2000 (all editions) , Microsoft MSDE 2000, and Remote Microsoft SQL Server instances.

SQL Studio Data Compare is available at <http://www.SQLStudio.com>.
