Tangra, Inc., a Microsoft Gold Certified Partner, has achieved the following competencies:

Business Process and Integration

Today, servers running Microsoft BizTalk Server, Microsoft Commerce Server, Microsoft Content Management Server, and Microsoft Host Integration Server on Windows Server 2003 form the backbone of a growing number of integration and business process solutions. Delivering the high levels of reliability and availability required of business-to-business websites requires not only great technology but also the competency to plan, deploy, support, and migrate those solutions.

Partners that have achieved this competency have proven proficiency in implementing and deploying server-based portals for driving Internet commerce, and business process applications featuring:

- Enterprise Application Integration (EAI)
- Business-to-business application integration
- Business Process Management (BPM) Solutions
- Web Application/Portal Development
- Workflow/Orchestration Solutions

Data Management Solutions

With the speed of business ever increasing, companies must find ways of capturing and analyzing business data in the most efficient and timely manner. Microsoft provides a complete end-to-end Data Management reporting and analysis solution to help improve organizations by providing business insight to all employees leading to better, faster, more relevant decisions. The broad Microsoft business intelligence story is supported by several components:

- SQL Server
- Windows Server System

The Microsoft Data Management Solutions competency is designed to provide additional benefits and support to Microsoft Certified and Gold Certified Partners with proven competency in implementing solutions in either one of the following specializations:

- The Business Intelligence specialization is focused on delivering services, tools, and application business intelligence using SQL Server technology.
- The Database Management specialization is focused on delivering migration tools and services, database administration tools and services and performance tools using SQL Server technology.

ISV/Software Solutions

The Microsoft ISV/Software Solutions Competency recognizes the skill and focus partners bring to a particular solution set. Microsoft Gold Certified Partners that have

obtained this competency have a successful record of developing and marketing packed software based on Microsoft technologies.

Custom Development Solutions

The Custom Development Solutions competency partners are providing custom-developed solutions to customers who require value-added capabilities to optimize business opportunities.

- **Application Infrastructure Development** is focused on delivering applications built using components of Microsoft Servers, which include Windows Server 2003, BizTalk Server, SQL Server, SharePoint Products and Technologies, and Visual Studio.
- **Smart Client Development** is focused on delivering custom-developed solutions accessed through a client, such as Visual Studio, Visual Studio Tools for Office, and Microsoft Office.
- **Web Development** is focused on delivering Web-enabled deployment solutions required in organizations that wish to operate and transact through the Internet using Visual Studio, ASP.NET, IIS, Windows Server 2003, and SQL Server.
